\$25.50 be paid. That the chairman of
Board of Works be instructed to make
a six foot wide walk opposite S. Sym-
ington store also to make culvert on 3rd
street on corner of Rosser Ave. and
Princess Avenue.

REPORT ADOPTED.

NOTICES.

Moved by Caldwell, Halpin that Ales.
A. Kelly, T. E. Kelly, Halpin and the
Mayor be a committee to wait on the
Hon. J. A. Stuart in reference to the
ward schools being built in the city, and
it is the opinion of the council that per-
mission be not given the school trustees
by the Land Gov. in council, to raise
money by debentures for the same.

Ald. Caldwell demanded the whole
council of the school trustees in the matter.
The schools should be built this fall and
they were acting illegally in the matter.

Ald. Flummerfelt said at the time of
the Public School meeting he was not in
favor of the ward schools but since then
he has found out that they were badly
needed and although they had acted illegi-
tally in the matter, he thought the council
should not interfere.

The mayor then thought it was too late
now to interfere in the matter.

Ald. Brown said that as the school
board had already spent considerable
money on the Ward Schools he thought
it was inadvisable on the part of the
council to interfere now. He said
they had known all along that the school
board intended erecting the buildings,
and the objection should have been made
before any money was spent. He was
strongly opposed to any steps being taken
in the matter.

Moved by Kelly Halpin that W. J.
White be heard on the subject. He said
the school board meeting was pretty well
divided, that the report of the motion
was sent to the board of education but no
motion was made of the amendment.
That the board of education granted the
school board the privilege of selecting the
site for the buildings. A communication
had been sent the board of education ex-
plaining the matter but was mislaid and
did not turn up until after the sanction of
the board had been given. If the true
facts had been known the sanction of the
board would not have been given. The
consent to raise money by debentures has
to be given by the Land Gov. in council.
He said it was an outrage on the citizens.
He said the board of education were told
the schools would cost \$20,000. They
would cost \$12,000 when completed.

Ald. Kelly wanted to know if permission
was not given could the school board raise
the money.
Ald. Caldwell said they could not as
they had acted illegally.

Moved in amendment by Flummerfelt.
Brown that council do not take any
action in the matter.

The vote on the amendment stood.
Yeas—Brown, Flummerfelt, Russell, 3.
Nays—Caldwell, Halpin, A. Kelly and
the Mayor, 4. Amendment lost.

The vote on the motion stood.
Yeas—Caldwell, Halpin, A. Kelly and
the Mayor, 4.
Nays—Flummerfelt, Brown, Russell, 3.
Motion carried.

Russell. Brown that the Chief of Police
be instructed to have all boxes on Rosser
ave moved, and to warn the merchants
from throwing waste paper etc. on the
street.

Moved by Kelly. Russell that the city
clerk be instructed to acknowledge the
receipt of cheque of \$7,000 from Hon. Jas.
A. Stuart for rent on gold and court
house, Carried.

By-law no. 273 to amend a section in
by-law no. 239 was read and passed.
Council adjourned.

GLENWOOD COUNCIL.

Met on Oct. 1st pursuant to adjourn-
ment, members all present, the Reeve in
the chair minutes of last meeting read and
confirmed, communications.

From minister of Public works re
bridge over the Souris.

From municipal commissioner re levy
for county, district and interest expenses,
also re grant of \$816 to this municipality.

From R. Hume re bid, due him for
making plan and Specifications for the
bridge over Plum Creek.

By Kerr and Sturt that R. Hume be
paid bid due him \$200 carried.

By Reid and Hopkins that the follow-
ing licenses be granted.
J. H. Hughes for lumber \$7.75
R. D. Richardson printing \$1.80
Wm. McCreary for printing \$2.75
Wm. McCreary repairing bridge on 28
St. \$12.00 carried.

By-law no. 124 to grant sanctioners
license.

By-law no. 125 laying taxes and pass-
es and signed.

Council adjourned to meet on Tues-
day Nov. 26 at 8 o'clock.

GRAND HAVEN BURNED.

A Half a Million Dollar Blaze
This Morning—Three
Churches and Thirty
Residences Burnt.

GRAND HAVEN, Mich., Oct. 1.—A ter-
rible fire broke out in the rear of
Stanton's grocery, directly west of the
Cutter house. The wind was blowing
furiously from the southwest and swept
the fire into a large drugstore, then into
the Cutter house block, where it spread
with wonderful rapidity. The entire
block was soon in flames, and some of the
goods had barely time to be rescued, some
rushing to the streets in their panic.

Fortunately there were no witnesses.
Sweeping from the hotel across Washington
St. to the millinery store of Miss Bell.
Mrs. Spire's residence and the Dutch re-
sidence church were destroyed. Then the
fire spread in a westerly direction,
and made a clean sweep of the entire
square between Washington, Columbus,
Third and Fourth streets, one of the best
residence quarters of the city. The Uni-
versity church, Mrs. Clayton's residence
and the Baker house, in which was the
telephone exchange, went next.

After crossing Columbus street, the flames swept
away the paragon of the Second Reformed
church, the Methodist church, and
several residences, up to and including
that of George H. Swanson. The last
house to burn was the elegant residence of
Dwight Cutler, which cost with furniture
\$50,000. The loss on the Cutter house is
heaviest of all. This house in 1872 cost
\$160,000. The fire departments of Spring
Lake, Grand Rapids and Muskegon re-
sponded to call for aid and rendered valu-
able assistance. The fire was under con-
trol by six o'clock. The First National
Bank and several stores and offices were
in the Cutter House block and everything
was lost except what was locked up in the
bank vault or in private safes. It is be-
lieved that the cause of the fire was a
candle. It is thought the loss will exceed
half a million.

A PASTOR'S DOUBLE LIFE.

Charges of Adultery and Bigamy
Preferred Against a Con-
gregational Clergyman

CHICAGO, Oct. 1. A Canadian pastor's
double life was brought to light by the
police last evening. At the armory a
reverend gentleman, Frederick T. McLeod
by name, walked the floor of a cell, de-
tained on charges of adultery and bigamy.

In another cell was his alleged wife, her
eyes red with tears and her face in her
arms. Mr. and Mrs. McLeod were arrest-
ed at their home on warrants sworn out
by Mrs. Mary McLeod, of Central Ont-
ario, N. S.

She said that Rev. Mr. McLeod
married her two years ago while pastor of
the Congregational church at Central
Ontario.

In a very short time the markets for
farm products will be active. At present
the principal quotations are as below to the
farmers.

Wheat..... 40
Barley..... 30
Oats..... 20
Hay..... 10
Beef..... 2.50
Pork..... 4.00
Mutton..... 4.50
Lamb..... 5.00
Butter..... 16 to 18
Eggs..... 2.00 to 2.25
Potatoes..... 3.00

THE HUSBAND GUILTY.

MEMPHIS, Tenn., Oct. 2. Charles
Woods, colored, is in jail here charged
with the outrage of Mrs. J. H. Rames,
white, some weeks ago. Woods tells a
startling story. He claims that J. H.
Rames, husband of the victim, offered
him horse and buggy and a sum of money
if he would kill Mrs. Rames and her sis-
ter. Rames paid Woods with liquor and
then left for a barroom in order to be out
of the way. Woods went to the house at
night, but instead of committing the
double murder, he ravished Mrs. Rames.
He attempted to escape but was arrested
and jailed. Rames was also arrested and
lynching is feared.

MANITOBA TAKE WARNING.

**Terrible Destructive Prairie Fire
Devastate North Dakota.**

BISMARCK, N. D., Oct. 2. Destructive
prairie fires have been raging in McLean
county, fifty miles north of here during
Sunday and Monday. The flames were
driven by the wind with a speed of sixty
miles an hour. Houses, barns, granaries
and all their contents have been destroyed.

The town of Washburn had a narrow
escape the flames reached within the
limits. The citizens turned out in mass,
men, women and children fighting with
desperation and heroism. The flames
extended for miles on either side of the
town, and the prairie as far as the eye could
reach was black and desolate. Many of
farmers lost all they had, but there will
be no suffering, as the people of the vil-
lage will save them all necessary assist-
ance.

STARVING IN ALASKA.

**Three Hundred Miners Without
Food and Supplies Upon
the Upper Yukon.**

PORT TOWNSEND, Wash., Oct. 1.—Four
miners have arrived from Forty Mile
Creek, Yukon river, Alaska, via St.
Michael's Island and Chukotka, and re-
ported that 200 miners on that river, 1,000
miles from any settlement, are in
distress circumstances, without available
means of relieving their wants.

Their food supply, which was taken
with supplies for them, was wrecked a
few hours after leaving St. Michael's.
The starving Yukon has been sent
with provisions, but it is very doubtful if
they can reach the miners in time. The
season will be closed and starvation will
face the 200 men who will undoubtedly
be attacked with surgery.

TRIED TESTED PROVED!

A YEAR ago last summer Mrs. F. Foster
with her children, 1 year and 10 months,
and a small dog, were taken according
to Robert L. Foster, husband of Mrs. Foster,
to the Yukon, to the Forty Mile Creek,
Alaska, to the Forty Mile Creek, Alaska.

GERMAN NAVAL ADDITIONS.

BERLIN, Oct. 2. The government has
placed to the credit of the navy depart-
ment the sum of 32,000,000 marks, to be
expended on a new navy of war. On this
amount 13,000,000 marks is on account
of vessels now in course of construction,
when the second appropriation for that
purpose. The remaining 19,000,000 marks
forms the first appropriation towards the
building of two new ironclads, three
cruisers, one torpedo boat and three
dispatch boats.

MORDEN'S AWKWARD FIX.

MORDEN MONITOR: Morden was in an
awkward fix one day last week. There
wasn't a marriage license to be got in the
town. Mr. Charles Collins had plenty of
marriage certificates in his possession but
he was away to Winnipeg. So he happened
that on this very day three couples had
made up their minds to get married, and
great was the consternation when told of
the fact that no marriage could take place.
However, when there was a will there's a
way, the telegraph was set to work, and
the requisite authority was got from head
quarters to proceed on a written form.
The marriage bells were set ringing, and
all went off with joy and bliss.

SUFFERING IN DAKOTA.

St. Paul Pioneer Press.
The report of probable suffering in the
two Dakota's this coming winter in con-
sequence of the failure of the wheat crop
in certain sections are receiving confir-
mation by appeals for aid. A short time
ago the chamber of commerce was called
in to consider the necessities of farmers in
Nelson county, N. D., who had lost their
wheat crops, and started a relief move-
ment in their behalf. They appealed for
help, and were supplied by another from Kan-
sas county in the Devils Lake region.
Secretary Talmage, through Mayor
Smith received a communication yesterday
from the Nelson relief committee, of which
Mr. C. R. Pickering, of Fort Lake is Sec-
retary, urgently requesting the steps be
taken to help the stricken farmers in their
hour of need. Mrs. Pickering in her let-
ter says that many of the residents of
Kansas county are, and have been for
some weeks, suffering for the most sim-
ple necessities of life. Food and clothing
have been almost entirely exhausted. Many
have suffered not only a total failure
of their crops by drought this season
but have experienced a partial failure last
season by the early frosts. She requests
an early response to her appeal.

OTTAWA, Oct. 3. The resignation of
Crow Baker as member for Victoria has
been received. The action was not unex-
pected. For some time he has lost all
inclination for political life, owing to fail-
ure in securing the superannuation of the
endowment collector at Victoria and the
appointment of Senator Macdonald, and a
seat for himself in the senate. Thomas
Carls a Victoria wholesale grocer and
successful railway contractor, is spoken
of as the government candidate.

Free Press here reports that while at
Regina Hon. E. Dewdney was taken to
task for failing to secure local autonomy
to the Northwest, and for withdrawing
the Northwest bill last session, and that
all this had some connection with McCar-
thy. Dewdney says he had no connec-
tion with any one at Regina on the sub-
ject of provincial autonomy, and that the
proposed Northwest act was withdrawn
at the earnest and repeated requests of
the opposition in account of the period
while in the Northwest he did not hear
McCarthy's name mentioned.

A writ has been issued to Frederick
Chamques, collector of customs at Leth-
bridge N.W.T. Judge Barbridge, giving
him the right standing, searching paper
in a letter from Dr. C. Smith Chamques
has been at his present post for over a
year the authorities say it was not found
necessary to give him this power until
now.

LONDON, Oct. 3. Canadian Pacific
shares, which have risen two points dur-
ing the past week will probably go higher
as a result of the statement in to-mor-
row's Canadian Gazette to the effect that
it is safe to make yet higher estimates of
the years earnings than was suggested in
the same journal during the past three
months. The Gazette indeed predicts
the net income for the year ending Feb-
ruary will equal about 31 per cent on the
total share capital.

BALTIMORE, Md., Oct. 1. The first
authentic information about the costs on
Navassa Island were received last night
in a letter from Dr. C. Smith Chamques
superintendent of the Navassa. Phosphate com-
pany who with C. W. Rely, James Foster,
and one other official, the only surviving
officers of the bloody affair, have taken
refuge on board the British man-of-war
Forward. On the morning of the 14th
ult. the negroes arose in a revolt and
killed four officers, Thos. N. Foster,
Joseph F. S. James Mahon, and William
J. Shea. Rely was hit on the head and
left for dead. He was found in a creek
hole, under a lot of wharf boards. His
body was carried to the house and took part
in a battle with black heads after having
thirty stitches taken in his scalp. He is
at present doing well. At noon on Mon-
day morning in front of the superintendent's
house and refused to work. When Jones
attempted to arrest one of the mutineers
he was knocked down and a howling
mob sprang upon him. He got to a house
where other officers had sought shelter
through a series of rocks and other mis-
siles. He took refuge in the upper story
and opened fire on the mob. The latter
lasted three hours, with an occasional
negro wounded, when they were started
by the explosion of a dynamite bomb
which had been thrown on the roof of the
lower porch. This was followed by
another, and there was a continued rain
of dynamite. The negroes then explod-
ed around and through the house on
poles and in some approaching on an
in which he had sought shelter. When
attempting to seek another shelter Foster
was hit by a knife and Joseph
Foster chopped to pieces with axes. Wm.
Shea and Mahon were also wounded.
Aid was finally sent from H. M. S. For-
ward, and the rioters dispersed. The
men say "Through Americans as we
are, truly each of us unconsciously exclaim
"God save the Queen." They have taken
as aboard and treated as royally, treated
as guests. We were our lives to the
prompt arrival of the Forward. The
mutineers are Baltimoreans. The
negroes still have possession of the island.

OTTAWA, Oct. 1. A reception was
tendered to the American Institute of Mining
Engineers which opened its session
here to-night at the railway committee
room at the House of Commons. About
thirty members are in attendance from
various parts of the United States. Sir
John Macdonald and Hon. D. Ross, of
Quebec, were present at the reception.
The Premier delivered a humorous speech.
In the course of his remarks he said that
the visit of the engineers would no doubt
result in profit to Canada and the visitors
would acquire knowledge of the Domini-
on's resources. He was afraid that
American brethren formerly held the
same opinion as did Victoria years ago,
that Canada was a region of ice and snow.
He was glad to find that the idea had
thoroughly disappeared, although some of
his particular friends in going to the
south of the border told him the Ameri-
cans were getting too affectionate. With
the assistance of the engineers they would
be able to do what Sheridan once threat-
ened to do in reply to a toast at
Bridgewater when the gold and silver
was in progress. "Don't you rivers and your
mines and blast your canals." The en-
gineers will be in session during the week
and will afterwards proceed on an excursion
to the Sudbury and Port Arthur mining
districts and the mines and quarries in
the eastern territory.

LONDON, Oct. 1. It is reported that
General Boulanger will leave London and
take up his residence in the Isle of Jersey.
It is said that this change is due to his
desire to reduce his expenses, as persons
who have been furnishing him with
financial support have refused to continue to
supply him with funds. He has had a
quarrel with Henri Rochefort, and the
latter will go to Egypt and pass the
winter under the protection of the French
Government.

CURIOUS THINGS OF LIFE.

A strange and was found in a perfectly fresh egg recently by a farmer near Niles, Mich.

A Western fakir is selling an adjustable engagement ring that can be made to fit any finger.

A Michigan chiropractor is making a triangular progress as "William the Conqueror."

Thomas Wilkinson, of Vernon, N. Y., has a beard five feet long, which he wears tucked under his vest.

A man named Life has been appointed postmaster of a Virginia town. He will have nothing to do with dead letters.

The champion economist of the Nineteenth century lives in Fulton county, Ga. He has his socks and gloves made from his own hair.

One City, W. Va., claims to have the smallest living woman. She is 27 years old, weighs one pound and weighs thirty-three pounds.

A Texan who is blind, deaf, crippled and lame offered \$1000 to any woman who would marry him, and he had received nine applicants in two weeks.

At a young man's debating club in Red Bluff, Cal., the following question was discussed: "Does a chihuahua rambling in a vacuum devour second intentions?" It broke up the club.

At Scotland, Pa., the other day a brakeman fell between the cars of a moving train. He counted sixteen carcasses as he passed over them and then jumped up and took his place again at the brakes. He was not shaken.

A 17-month-old, milk-white child, who was found about ten feet below the surface of a large timber, was supposed to have been portions of a bridge built early in the last century. The timbers are only very slightly decayed.

At Easton, Pa., a woman brought a pair of shoes, and at home found a small purse containing the contents of one of them. It contained \$1200 in negotiable bonds. She found the owner, who refused to believe she had lost the bonds at first, but was soon convinced.

An assistant to a Connecticut planter poured a small quantity of water into a pot of hot oil, in order to satisfy a doubt in his mind as to what the effect would be. He was severely injured, but is likely to recover. A reminder of the experiment to the place.

Three five years ago George M. Woodruff, of Littlefield, Conn., cut his initials on the trunk of an apple tree. The tree disappeared in time, but when the tree was cut down and split into firewood, the initials were found on four inches from the surface perfectly distinct.

In the little town of Arroyo, in France, there are forty-two young married girls and only three young men who are ready for matrimony, and one of these has proved so recent to home influence that he is about to marry a girl belonging to a neighboring village.

Some time ago, Mattie Pennell, a young woman of Santa Barbara, Cal., had some lemon juice accidentally spilled over her hair on one side of the head. Since then the hair on that side has become perfectly white and the ends of the hair curl, as though treated with a curling iron.

John Simmons, of Galveston, found a good sized pearl in a dish of raw oysters a few days since. He placed the pearl in the bottom of his bed-room. Two days later he found the pearl a soft gray mass with a red center. If a finger is placed on the pearl it becomes hard and the red spot disappears.

At St. Louis, Mo., a red-headed man, 62 years old, in 1870 years 1870 had been 50, a good deal, but not a bad one. I have played the word, and it doesn't owe me a cent. I've never seen a man in a red head, and I've never seen a man in a red head, and I've never seen a man in a red head.

A New York correspondent near Carson City, Nev., made an acquaintance of an ancient dog. He discovered a sack in one of the corners of the dog's house, where a jet was forced out under enormous pressure. After experimenting he found that this would not equal to the force of a steam engine, and he made a machine to imitate the work of the dog's head.

W. Smith, of Patuxent, has recently recovered from a train, after having been seriously injured by a train. He is now recovering from his wounds. He is now recovering from his wounds. He is now recovering from his wounds. He is now recovering from his wounds.

CARE OF THE FEET.

The Anatomy of the Foot Described by a Medical Man.

The purpose of the foot is for progression and support, says a physician in The Hygienic Epoch. As a consequence of the scale of animal life we find that the hind feet always differ from the fore feet. So it is in man; the hand differs from the foot. The anatomical construction of the foot in many ways bears close resemblance to that of the hand.

The foot is controlled by muscles which give it the ability to walk and stand. These muscles are often attacked by a disease, such as paralysis, and as a result, we have the many deformations of the foot. This is especially true in childhood, and the bones being then soft, they adapt themselves to the diseased muscles. As the child grows older the bones harden, and as a result, they never can be cured. The destruction of these muscles gives us the flat foot and the arched foot, which serve to distinguish the races. The more arched the foot the higher and more beautiful the race. The flat foot and projecting toes of the colored race are both due to the action of their muscles.

Small feet are now considered beautiful, but it was not always so, as you can notice if you will study the statues of German goddesses, which show a foot much longer than is considered desirable in this age.

The great toe in your shoe should be exactly in line with the axis of the foot. This must be so in order to have a graceful walk. In walking, the heel is raised while the toes are crumpled downward. When they are raised in leather and a firm sole there must be some extra room in order to give freedom of motion.

When the shoe is tight in some places, it presses on the muscles, and consequently they are not able to perform their proper functions. As a result, the great toe is drawn out of a line of the axis of the foot; some of the muscles are strengthened, others are weakened. As a result, the foot is not straight, and the outer side curved.

The shoe now made curve almost equally on both sides, and the curvature of the sole of the shoe is usually by the structure of the shoe. A shoe is not necessarily advantageous because it is loose, as some portions of the foot are able to do great pressure, and thus reduce other parts which are weaker. The shoe should be loose about the ball of the foot and about the toes. Different styles of shoes may be adopted for different purposes, but the shoe should be loose about the ball of the foot and about the toes.

A reformation in the making of shoes will never take place until some authority learns the trade of shoemaking and becomes an artist in that line, so that he may have an opportunity of studying the practical as well as the theoretical side of the question.

DIE AND SAVE MONEY.

By dying now a man can save money. Not only can he save money, but he can also save his family from the expense of a funeral. A man can spend more than \$1000 in a funeral, but he can save this money by dying now.

A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now.

A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now.

A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now.

A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now.

A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now.

A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now.

A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now.

A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now.

A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now.

A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now. A man can spend more than \$1000 in a funeral, but he can save this money by dying now.

THE BEST EDUCATION.

That Which Trains Hand and Brain To Perform the Most Useful Work.

Each year brings to the general public, as well as to the educators, the conviction that the present system of education is inadequate to the demands of the day. The great public, which is more directly interested in school methods than the educators themselves, are waking to the conviction that there is much to be learned from the study of the hand and the brain.

It is not only the study of the hand and the brain, but the study of the hand and the brain, which is the best education. It is not only the study of the hand and the brain, but the study of the hand and the brain, which is the best education.

It is not only the study of the hand and the brain, but the study of the hand and the brain, which is the best education. It is not only the study of the hand and the brain, but the study of the hand and the brain, which is the best education.

It is not only the study of the hand and the brain, but the study of the hand and the brain, which is the best education. It is not only the study of the hand and the brain, but the study of the hand and the brain, which is the best education.

It is not only the study of the hand and the brain, but the study of the hand and the brain, which is the best education. It is not only the study of the hand and the brain, but the study of the hand and the brain, which is the best education.

It is not only the study of the hand and the brain, but the study of the hand and the brain, which is the best education. It is not only the study of the hand and the brain, but the study of the hand and the brain, which is the best education.

It is not only the study of the hand and the brain, but the study of the hand and the brain, which is the best education. It is not only the study of the hand and the brain, but the study of the hand and the brain, which is the best education.

LITERARY LIGHTS.

Mrs. Cleveland is engaged in translating a French novel into English.

Joel Benton's home at Amherst, N. Y., is called "The House of the Seven Places."

Edgar Saltus has written for early publication a novel called "The Girl with the No. 1 Eye."

Ouida has been writing for forty years, having begun her literary career by a story when she was a child.

Mrs. Burnett receives \$25 for every performance of her dramatization of "Little Lord Fauntleroy."

Prof. Freeman is spending his winter in Sicily, doing in Sicilian history for material for a new book.

Myrtle Dallas, who has been writing short stories for twenty-five years, now issues her first novel, "Adrietta."

J. H. Shortness is a short man, and has a rather strong face, a big nose, black hair and an impediment in his speech.

Robert J. Burdette declares that, although he writes continually for the Sunday papers, he has not read one for four years.

Guy de Maupassant and his valet are to make an excursion to central Africa, disguised in the black burrows of the Arab.

Wilkie Collins is an assiduous worker, sitting at his desk almost all day, and finding his recreation in a game of whist in the evening at his club.

Dr. Alexander Kolbat, the eminent Talmudic scholar, has completed, after twenty-five years' labor, an enlarged edition of a lexicon of the Talmud.

Mr. Gladstone and Lord Randolph Churchill recently purchased over fifty copies of "Little Lord Fauntleroy" for presents among their young friends.

E. L. Farjeon, the novelist, is the son-in-law of George Jefferson, and lives in Adelphi Terrace, a quiet, romantic corner of London overlooking the Thames.

Burdette is deeply interested in the education of his only child, who is to read Sappho at 12, that he revamped his own Latin and Greek in order to coach him.

Mrs. Oliphant, the novelist, is 65 years old and a hard worker, with no desire for newspaper fame, living a secluded life with her two children near Windsor castle.

Amama M. Douglas, the popular novelist, who for the last fifteen years has been the chief support of her father, mother and sister, writes novels at the rate of two a year.

Marion Crawford is a thoroughly familiar name to French, German, Italian, Spanish, Latin, Greek, Sanskrit, Arabic and Persian, and has a long acquaintance with Turkish and Russian.

Walter Besant made a funny mistake in his latest novel, "For Faith and Freedom," when he described one of his characters as going "on board a steamer bound for New England" in 1867.

Swanberg, standing scarcely five feet in high heel boots, has an immense head covered with wild, unkempt hair; a face pale, thin and almost ghastly, and a mouth small and childish in expression.

Browning says that "How the Good News Was Brought from Ghent to Aix" was written under the bark of a vessel of the African coast, when he was shaken up by travel. It has no historic basis.

Countess Tadolio does not sympathize with her husband's extreme religious views, and threatens, if he attempts to carry out his plans of selling all that he has for the benefit of the poor, to seek for official investigation of his sanity.

William Winter is described as "a slightly built man of about 50, with gray hair falling in picturesque confusion over a high forehead, beneath which look out a pair of dreamy, poetic eyes, that snip and sparkle."

The dress collar now plays high, the waistcoat low, in fashion's winter game. Double-breasted coats of manilla linen are among the thrills of next summer.

London favors the Windsor scarf for wear next summer, especially with velvet shirts. Striped underwear for men is noted style. White and gray are the colors most liked.

White pigque trousers, with black half buttons, are the proper thing for men in globe morning. The striped silk nightgowns are in preparation for next summer, discount the rainbow in color.

To make your silver cane head distinguished on have only to have it set with your initials in rubies. See name John.

Marriage is not transformation. John will be as cross when he is hungry as when he is not. He will be as cross when he is hungry as when he is not. He will be as cross when he is hungry as when he is not.

Marriage is not transformation. John will be as cross when he is hungry as when he is not. He will be as cross when he is hungry as when he is not. He will be as cross when he is hungry as when he is not.

Marriage is not transformation. John will be as cross when he is hungry as when he is not. He will be as cross when he is hungry as when he is not. He will be as cross when he is hungry as when he is not.

FARM AND GARDEN.

SUBJECTS OF GENERAL INTEREST TO FARMERS AND GARDENERS.

A Scale of Points and a Diagram to Illustrate Them for Measuring Short-horns Proposed by the Chief Inspectors of Stock in Wales.

While no good short-horns are bred in this country as in England, it is natural to look to the old country for authority on this breed of animal. As considerably different opinions prevail as to the best methods for measuring short-horns we have reproduced a scale of points and a diagram to illustrate them, as proposed by the chief inspectors of stock in New South Wales, and which is embodied in the precedents of the best English authorities. The illustration

gives an outline of a short-horn bull with the different points marked to correspond with the scale. The number of points is valued at 1,000.

SCALE AND VALUES OF POINTS. A bull.
